- Riparian Woodland Planting Potential
- Floodplain Woodland Planting Potential

Notes
 This map shows areas for woodland planting potential and runoff attenuation features. The potential attenuation features aren't shown on the authority wide overview maps. The map shows the flood risk data and information based on the map title and legend. If no data is displayed on the map, or not all features are present, this indicates that the respective flood source or features are not present within this area.
 The Working with Natural Processes in Wales: Wider Catchment Woodland Potential dataset is based on the British Geological Survey (BGS): 50k Onshore Geology Data. This BGS data has squares missing where BGS have not surveyed the area. As the BGS data did not exist in parts of Powys NRW were unable to create the Wider Catchment Woodland Potential dataset in this area.

- Brecon Beacons National Park Authority- see separate mapping
- Snowdonia National Park Authority
- Settlement boundary
- Runoff Attenuation Features 1% AEP
- Wider Catchment Woodland Potential
- Riparian Woodland Planting Potential
- Floodplain Woodland Planting Potential

Notes
 This map shows areas for woodland planting potential and runoff attenuation features. The potential attenuation features aren't shown on the authority wide overview maps. The map shows the flood risk data and information based on the map title and legend. If no data is displayed on the map, or not all features are present, this indicates that the respective flood source or features are not present within this area.
 The Working with Natural Processes in Wales: Wider Catchment Woodland Potential dataset is based on the British Geological Survey (BGS): 50k Onshore Geology Data. This BGS data has squares missing where BGS have not surveyed the area. As the BGS data did not exist in parts of Powys NRW were unable to create the Wider Catchment Woodland Potential dataset in this area.
